Integrating the Widget via HTML code.....	4
Activating lubenda Banner Cookies Law .....	5
PrestaShop Official GDPR compliance.....	6
Ap Builder Template (Leo Theme).....	7
One Page Checkout PS Module (easy, fast & intuitive).....	8

## Configuration

Configuration of the module is very simple; you just need to insert API ID and the site ID provided by lubenda to immediately integrate all the functions of the services. Thus it is possible to integrate the privacy policy and cookie policy simply and intuitively – as well as the banner cookies law, where necessary.

### Where to find: lubenda API ID

To retrieve the APIs, open the “Use a direct link” TAB.

White label  Simplified privacy policy

Add a widget to the footer   Use a direct link   Embed the text in the body

IT   EN

Privacy Policy

<https://www.iubenda.com/privacy-policy/2336XXXX> COPY

Place this code in the **<body>**, where you want the link to appear

The ID to insert in the “lubenda API ID” entry is the one that appears at the end of the URL: 2336XXXX.

### Where to find: lubenda Site ID

We can find the Site ID code by analysing the code to insert in our site provided by lubenda.

IT   EN

```
<script type="text/javascript"> var _iub = _iub || []; _iub.csConfiguration = {"cookiePolicyId":2336XXXX,"siteId":1031XXXX,"lang":"en"}; </script><script type="text/javascript" src="//cdn.iubenda.com/cookie_solution/safemode/iubenda_cs.js" charset="UTF-8" async></script>
```

COPY

The code to be inserted is the number after “**siteId**”:

## Integrating the text of a CMS

lubenda allows for the integration of text from the privacy policy and cookies body into the body of any html page through the use of a JavaScript code. Unfortunately, it is not possible to integrate JS code directly into a PrestaShop CMS for security reasons.

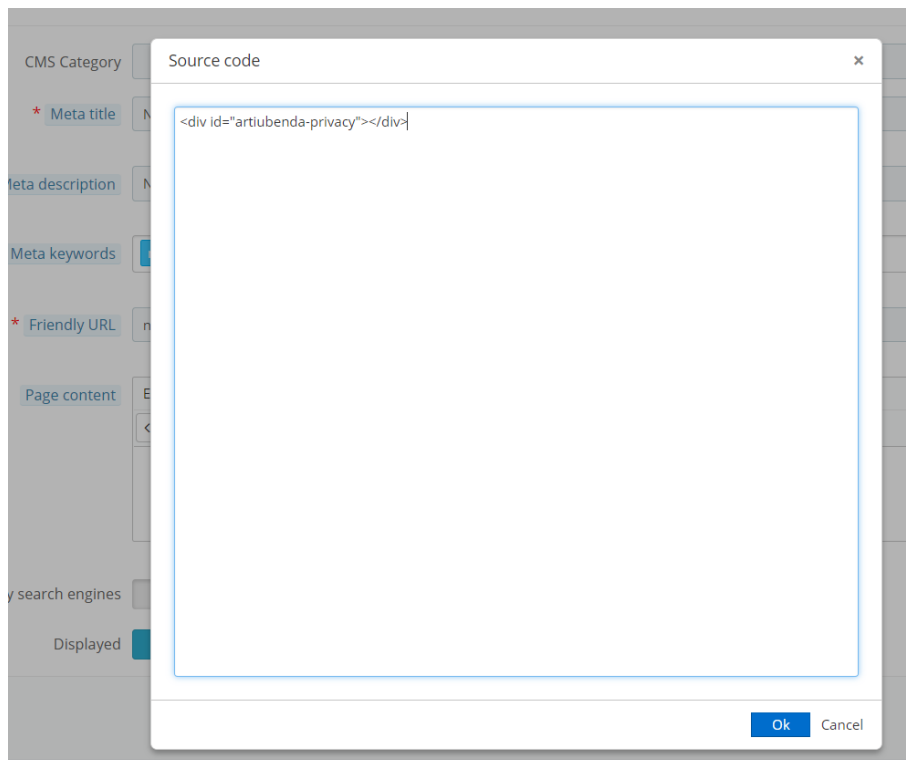

Via this module, it is possible to bypass this limit by inserting a simple HTML code into the CMS, which is permitted by PrestaShop.

To retrieve the text of the Privacy Policy in modification of the CMS, we need to click on "Source Code".

To insert the text of the Privacy Policy, we insert the following HTML code:

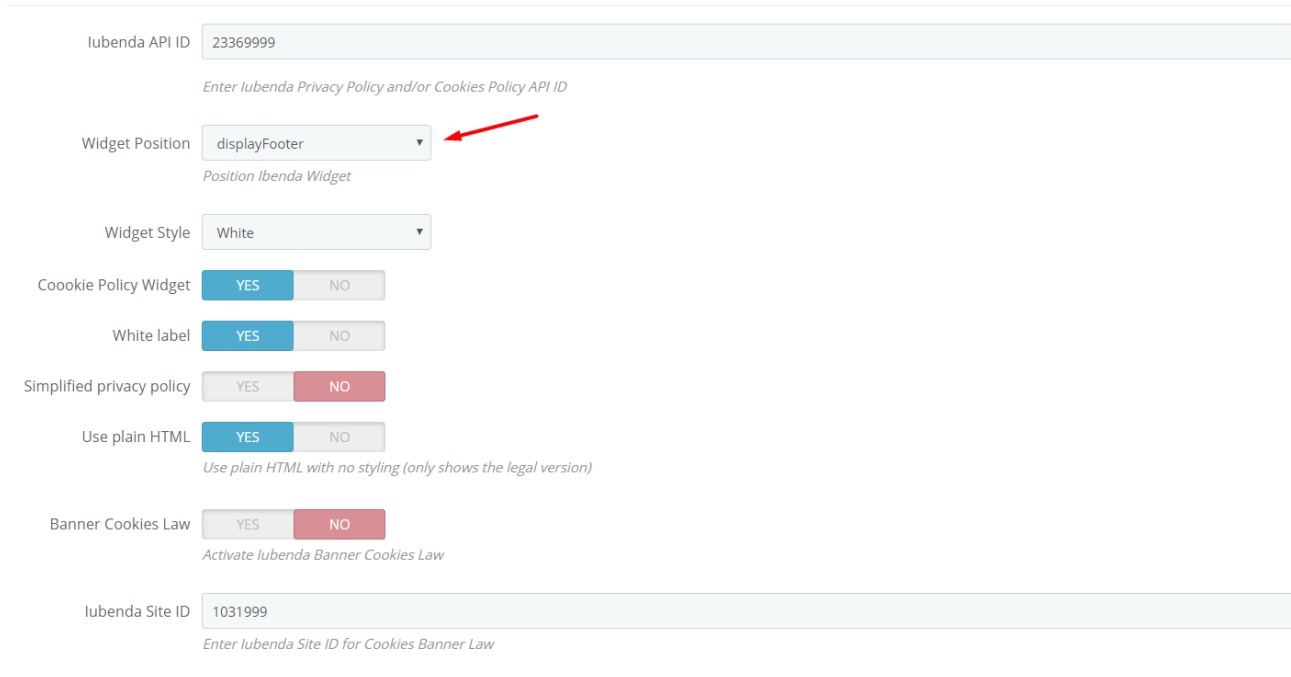

- **For the Privacy Policy:** `<div id="artiubenda-privacy"></div>`
- **For the Cookie Policy:** `<div id="artiubenda-cookie"></div>`

We must repeat the operation for every language installed on the site. The module will take care of the substitution of the DIV with the lubenda JS code in compliance with the specifications of PrestaShop.

## Integrating Iubenda Widgets in PrestaShop

The insertion of Privacy Policy and Cookie Policy Widgets is very simple: select one of the many preset positions in the module (Widget Position drop-down menu), insert a new Hook position, and for maximum flexibility – where this is considered necessary – an HTML code to retrieve related Widgets.

Iubenda API ID: 23369999  
*Enter Iubenda Privacy Policy and/or Cookies Policy API ID*

Widget Position: displayFooter  
*Position Iubenda Widget*

Widget Style: White

Cookie Policy Widget: YES NO

White label: YES NO

Simplified privacy policy: YES NO

Use plain HTML: YES NO  
*Use plain HTML with no styling (only shows the legal version)*

Banner Cookies Law: YES NO  
*Activate Iubenda Banner Cookies Law*

Iubenda Site ID: 1031999  
*Enter Iubenda Site ID for Cookies Banner Law*

### Add a new Hook position

Where desired, you can add a new Hook position by modifying any .tpl file of the template in use, inserting the following code where desired:

```
{hook h=' displayIubendaPrivacy'}
```

### Integrating the Widget via HTML code

You can also integrate the Iubenda Widget where desired using HTML code (as with integration into the CMS text). To do this, simply insert the following codes:

- **For the Privacy Policy:** `<div class="artiubenda-widget-privacy"></div>`
- **For the Cookie Policy:** `<div class ="artiubenda-widget-cookie"></div>`

## Activating Iubenda Banner Cookies Law

The module allows you to insert the Iubenda Banner Cookies Law: for this function, there is a module released by Iubenda itself, but it does not pass PrestaShop validation.

### Validation - *iubenda Cookie Solution*

Show details

Summary	i
Requirements	✓
Structure	✓
Errors	78

**Summary**

**Module details**

Giving the main details of your module allow you (and us) to make sure our systems can understand your content. They are used by the validation steps of the Validator, on the marketplace and on PrestaShop itself.

<b>Technical name:</b> iubenda	<b>Version:</b> v1.0.0
<b>Display name:</b> iubenda Cookie Solution	<b>Author:</b> iubenda
<b>Description:</b> iubenda's Cookie Solution allows you to manage all aspects of cookie law on Prestashop.	<b>Category (tab):</b> front_office_features

[Download the report \(PDF\)](#)

**Next steps**

Your module passed validation? Then you can submit it on the PrestaShop Marketplace. Once received, we will review the features, security and marketing of your module. Please allow us up to 72 hours to respond.

We have therefore decided to integrate the possibility of activating the banner cookies law via our module, even though **we always advise the use of our module.**

- [FREE] Art Banner Cookiechoices (EU Cookie Law) GDPR [RGPD 2016/679]

#### Together with our module:

- **Art Webmaster Tools Site Verification and Hreflang**

For better integration with PrestaShop and better control over the tracking cookies installed.

Banner Cookies Law  YES  NO  
*Activate Iubenda Banner Cookies Law*

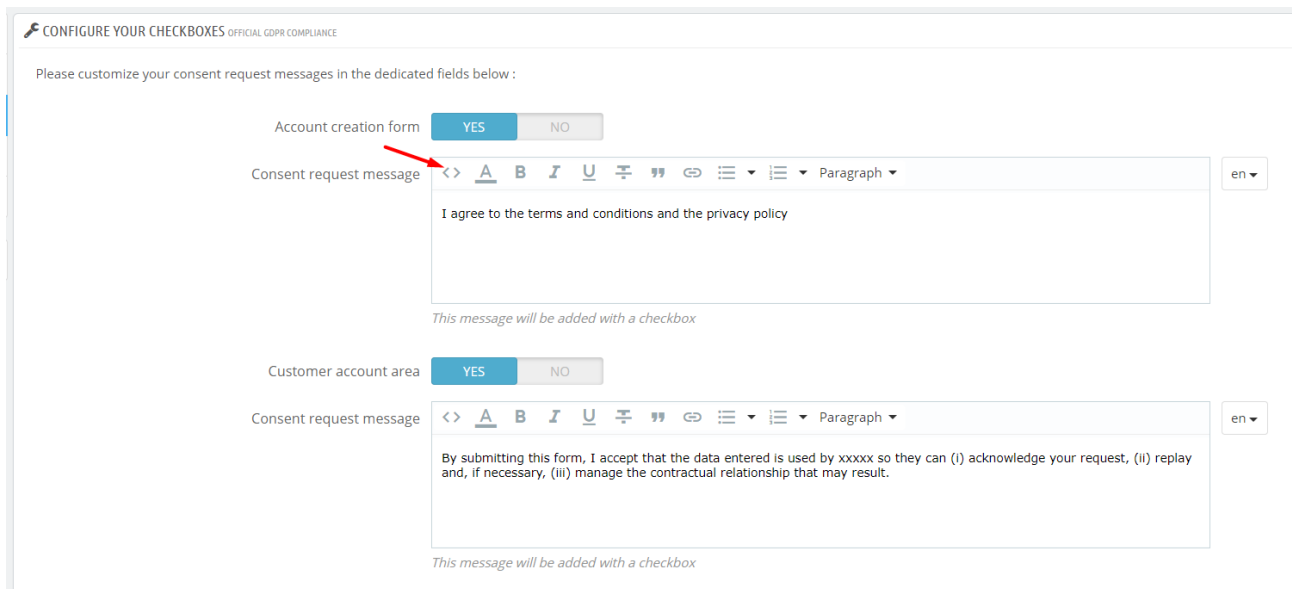

Iubenda Site ID   
*Enter Iubenda Site ID for Cookies Banner Law*

Activation is very easy: simply activate the Banner Cookies Law and insert the Site ID provided by Iubenda.

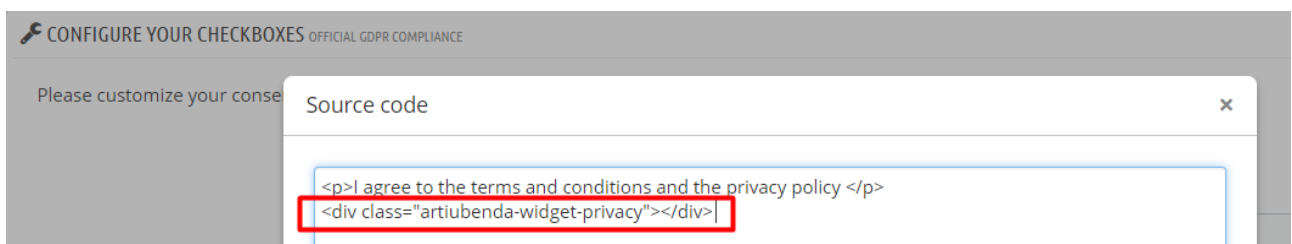

## PrestaShop Official GDPR compliance

If we use the official PrestaShop module for the GDPR, we can add lubenda widgets to our personalised consent messages very easily.

We need to click on the code and insert:

- **For the Privacy Policy:** `<div class="artiubenda-widget-privacy"></div>`
- **For the Cookie Policy:** `<div class="artiubenda-widget-cookie"></div>`

In this way, the lubenda widget will appear directly beneath the text inserted by the Official GDPR compliance text.

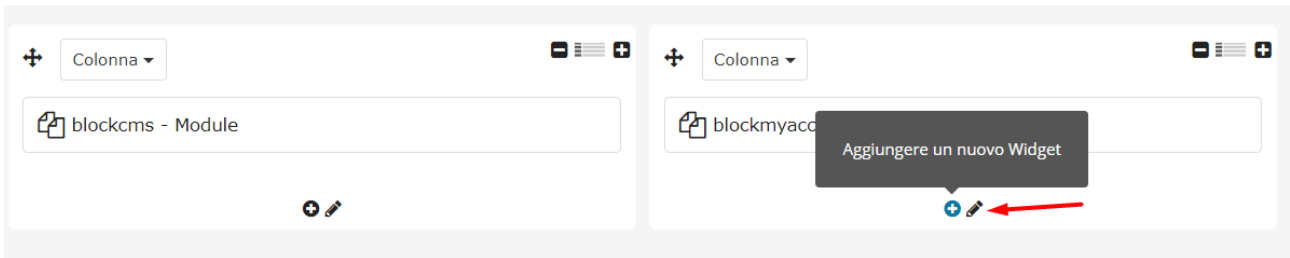

I agree to the terms and conditions and the privacy policy

←

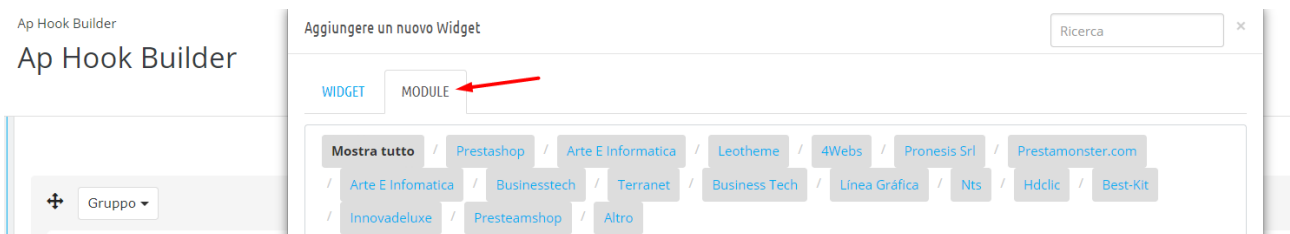

## Ap Builder Template (Leo Theme)

If you use a Leo theme or another theme based on **Ap Page Builder**, you can easily insert the lubenda widget in the position you prefer.

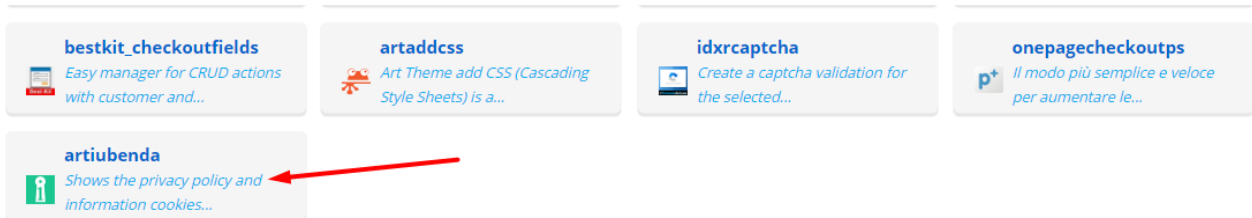

Just click on "Add a new Widget"

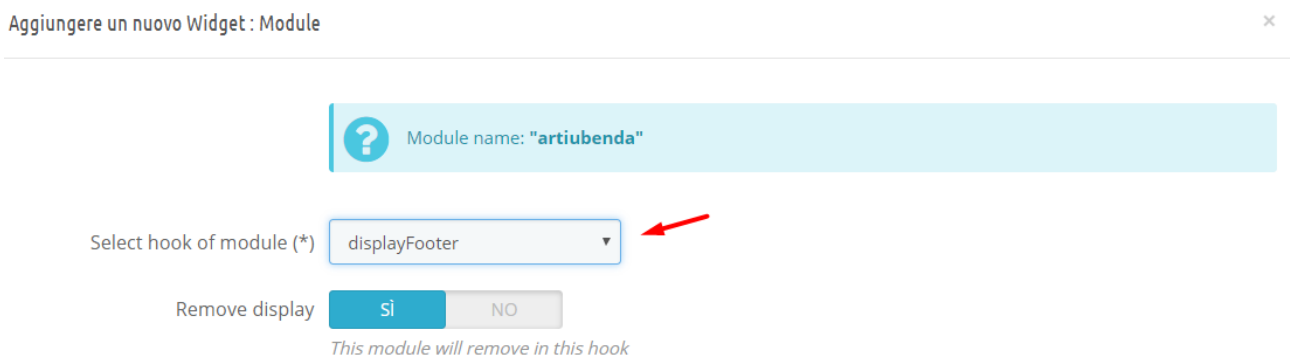

Click on the tab: MODULE

Search for the module and click above it

Now we need to select the Hook position that we selected in the configuration of the module.

We need to click on save to confirm, and then we save the Ap Page Builder configuration again.

## One Page Checkout PS Module (easy, fast & intuitive)

The module substitutes the One Page Checkout popup with the lubenda Privacy Policy widget.
